Patio Laying Patterns

Laying Patterns

Your choice of laying pattern will depend on your range of paving and the size and shape of your patio. For a completely random patio choose from paving with five or more sizes of stone, eg Old Town Flagstone Paving and Wetherdale Paving. However, it is possible to create a random area from ranges with only three sizes, eg Old Riven. The laying patterns show the approximate finished size for a selection of random patios. The chart gives the number of paving stones needed for each design.

Joint Widths

The sizes and quantities given throughout the catalog allow a nominal 1/2" joint width. When laying random paving and circles, and in particular Wetherdale and Old Town with their felled edges, joint widths will depend on the paving type and laying pattern chosen and will be variable - from approximate 1/2" to 1".

The dimensions given for the random patterns and circles on these pages are therefore only approximate and dry laying first is always recommended.
