## About us

Welcome to the Bradstone guide to paving, walling and edging. We want to help you make the most of your outdoor living space, to see it as an important asset, a valued extension of your property, a place to relax and enjoy the company of family and friends.

Bradstone is a superior outdoor landscaping material, world renowned as an attractive yet cost effective alternative to natural stone. Bradstone embodies an elegance born of an earlier time, while taking advantage of the high performance, low maintenance and long life offered by modern high grade manufacturing technology.

Top craftsmen have taken special care to replicate, in hue, complexity and texture, the **handcrafted stonework** of English tradition in hundreds of faithfully detailed, properly-fired master stone designs. Each master design has been cast into finely detailed molds, and then used to reproduce a rich line of paving and walling products in almost endless variations.
